

## **Environmental Management Policy**

ASAP strives to achieve a high standard of environmental care in conducting all of our operations.

We acknowledge that our operations may have a negative impact on the environment, and that legal and moral obligations must be addressed to avoid environmental damage.

We consider the environmental impact of all aspects of our business lifecycle, including inputs, operations, and outputs, and ensure that adequate controls are implemented to minimise harm to the environment.

Top management is committed to:

- Compliance with applicable legislation and standards, including ISO 14001.
- Compliance with requirements of our customers and other interested parties
- Establishing a framework for setting environmental objectives
- Communicate openly with our interested parties regarding environmental issues
- Prevention and minimisation of pollution where possible by considering potential harm of our operations
- Establish programs to minimise waste
- Implementing, maintaining and improving an effective Environmental Management System.

All workers, including employees and contractors, are encouraged to consider their daily activities and take reasonable steps to minimise environmental harm where possible.

We will consider the environmental impact of all products and services we supply, including the provision of various types of security services, and ensure we minimise the impact on the environment as far as reasonably practicable.

Employees are also encouraged to discuss, with managers and supervisors, changes to existing practices that will help in avoiding environmental damage or deterioration.

Marcus Skeen  
Managing Director
